Professional Summary

Accomplished Data Scientist and Artificial Intelligence Engineer with 4+ years of professional experience leveraging machine learning and deep learning to drive business results. Specialized in developing predictive models, processing large datasets using Pandas/NumPy, and creating actionable dashboards. Strong communicator with demonstrated leadership in technical projects.

Skills & Expertise

Python, R, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Machine Learning, Deep Learning, Artificial Intelligence, Data Science, Power BI, Tableau, Excel, Git, GitHub, Docker, Kubernetes, AWS, Azure, Communication, Leadership, Problem Solving, Critical Thinking

Professional Experience

Data Scientist & AI Team Lead — DataVibe Analytics (2022 - Present)

- Engineered and deployed a customer churn prediction model using PyTorch and Scikit-learn, saving the company \$1.2M annually.
- Designed interactive corporate dashboards in Power BI and Tableau, integrating SQL database feeds to track real-time metrics.
- Spearheaded the migration of training pipelines to Docker and Kubernetes clusters on Microsoft Azure.
- Provided leadership to junior analysts, guiding research in deep learning and NLP models.

Junior Data Analyst — Global Finance Corp (2020 - 2022)

- Extracted and cleaned transactional records from MySQL databases using complex SQL queries and Python Pandas.
- Built regression models and statistical analyses using NumPy and R to evaluate credit risks.
- Compiled monthly financial reports and insights using advanced Excel formulas and VBA.

Education

Bachelor of Science in Statistics & Data Science — Metro Science University (2020)
